EJSCREEN Multisite Summary

This report summarizes environmental and residential population information for user-defined areas, and combines that data into indexes.

Sample Summary Report for County FIPS

Residents within any of the 3 specified counties
Area in Square Miles: 1948.54
Population: 1,021,191

EJ Indexes

The summary and supplemental EJ indexes are a combination of environmental and residential population information.

For each of the environmental indicators, there is an EJ Index and a Supplemental EJ Index.

The indexes for a selected area are compared to those for all other locations in the state or nation.

Note: Feature counts shown (such as the count of schools) are estimated totals -- They use the count of features in each blockgroup and adjust that based on what share of the blockgroup's residents are inside the analyzed area. They estimate the total in the area rather than using exact coordinates of each feature to count inside each mapped area. If present, rows showing what % of these residents have a feature or area type in their block group show what percent of the residents analyzed live in a block group that contains at least one of that type of feature or that overlaps that type of area, and the ratio columns compare that percent to the equivalent percent of all US residents or of all residents of the state(s) analyzed. Where an analysis covers sites in more than one state, the State average here means the average among all the residents at these sites, using the statewide value in each resident's state.
